	Rating	Framework
Angular	★★★★★	ANGULAR
Laravel	★★★★★	LARAVEL
Electron	★★★★☆	ELECTRON
React	★★☆☆☆	REACT
Django	★☆☆☆☆	DJANGO
NEXT.js	★☆☆☆☆	NEXT.JS

WORK EXPERIENCE

Full-Stack Developer   2024-Present

Prominent Outsource | Bacolod City

Working as a Full-Stack Junior Developer on a task tracker project, implementing designs and handling data on the Angular frontend, and expanding functionality on the PHP Laravel backend. I manage RESTful API integrations to ensure seamless communication between the frontend and backend, while also developing the app with Electron for cross-platform desktop compatibility. This role has strengthened my skills in delivering a responsive user interface and enhancing backend capabilities within an existing framework.

PROJECTS

Verse Guru

Bible Web Application

A bachelor's degree capstone project to develop a Bible application using pure Laravel. Designed and implemented an interactive interface with search, verse navigation, and bookmark features, enhancing my skills in full-stack development and user-centered design.

IV OF SPADES Dormitory Management System

Dormitory Management System

A Dormitory Management System developed as part of a project using vanilla PHP and JavaScript. Built an intuitive interface for managing student records, room assignments, and payment tracking. This project strengthened my skills in backend logic and frontend interactivity without relying on frameworks.

ZEN EXPERIENCE WEBSITE

Shopify Website

Developed a Shopify website for Zen Experience, completing the project within a single day. Customized the site with HTML and JavaScript modifications to enhance functionality and design.

MyTaskOwl Website

Wordpress Website using Elementor

Designed and developed a responsive website for the MyTaskOwl web application using Elementor and WordPress. Continuously refining and enhancing the site while improving expertise in web development. Optimized for both tablet and mobile devices.
