- Node.js
- NestJS

Databases & Cloud

- MySQL
- NoSQL
- AWS
- Cloudflare
- Google Cloud Console
- Apple Store Connect
- Vercel
- Laravel Forge

Stan Rainier D. Salazar

Full-Stack Developer

WORK EXPERIENCE

Full-Stack Developer

2024-2026

MyTaskOwl LLC | Bacolod City

As a Full-Stack Developer and Mobile Team Lead, the focus is on building out a task tracker using Angular for the frontend and PHP Laravel for the backend. While writing code for responsive designs and handling RESTful API integrations, the role involves leading the mobile team through the planning and deployment process for the Apple App Store and Google Play Store. It is a mix of hands on work, expanding backend functionality and refining the UI and managing task delegation to ensure the mobile and web sides stay in sync. This experience has been a crash course in both technical execution and the realities of leading a team toward a successful launch.

Freelance Web Developer

Since 2024

Freelance | Bacolod City

Designed and developed responsive websites for clients using Shopify and WordPress with Elementor, delivering tailored solutions based on business requirements and branding guidelines. Handled full website setup including theme customization, page building, plugin integration, product configuration, and performance optimization. Managed domain configuration, hosting setup, and deployment to production environments to ensure secure and reliable launches. Provided post deployment support, content updates, and basic SEO configuration to improve visibility and usability

Junior Web Developer – Internship

2024

Prominent Outsource | Bacolod City

Began as a Full-Stack Engineering Intern from January to June 2024, successfully building core application features and demonstrating strong technical ownership to secure an immediate transition into a full-time role upon graduation.

EDUCATION

University of Negros Occidental – Recoletos

B.S. Information Technology

2020-2024

Tools & Platforms

- Git
- GitHub
- Shopify
- WordPress
- Elementor

- Agile Mindset
- Problem-Solving
- Collaboration
- Active Listening
- Root Cause Analysis

ACHIEVEMENTS & AWARDS

PROGRAMMING PROFICIENCY (2024)

AWARDED BY UNIVERSITY OF NEGROS
OCCIDENTAL - RECOLETOS COLLEGE OF
INFORMATION TECHNOLOGY

PORTFOLIO

STANRAINIER.VERCEL.APP
SCAN TO GO TO MY PORTFOLIO

PROJECTS

MyTaskOwl Mobile

2026

React Native | Expo | Apple Connect | Google Play Console

Architected and built a cross-platform mobile application using React Native and Expo to scale platform accessibility across iOS and Android, successfully streamlining feature parity with the web ecosystem. Managed native hardware optimization and automated deployment pipelines while overseeing full app compliance, asset configuration, and production build releases for deployment to the Apple App Store and Google Play Store.

MyTaskOwl Admin Panel

2025

NextJS | Vercel

Focused on building highly efficient, clean interfaces using Next.js to manage high-volume application data, user profiles, and platform metrics. Utilized server-side rendering and static optimization to ensure near-instantaneous load times and secure backend operations, deploying the architecture seamlessly on Vercel for maximum edge performance.

The Little Shelf

2025

WordPress | Elementor | WooCommerce

Planned, developed, and deployed a robust, visually compelling e-commerce website using WordPress, Elementor, and WooCommerce to provide a friction-free shopping journey. Built custom styling modules, integrated secure payment gateways, and established tailored product management systems while implementing performance tuning and SEO best practices to drastically expand organic visibility and improve page load speeds.

Zen Experience

2024

Shopify

Implemented and launched a tailored e-commerce storefront utilizing Liquid and Shopify to optimize digital retail performance and elevate user engagement. Focused on executing custom theme modifications, seamless plugin integrations, and full checkout optimization while improving site architecture and navigation paths to enhance customer conversion funnels and maximize overall product sales.

MyTaskOwl Software

2024

Electron | NestJS | TypeScript

Developed a dedicated, cross-platform desktop application for macOS and Windows using Electron and NestJS to bring core platform capabilities natively to user desktops. Focused on optimizing local system performance, minimizing memory overhead, and maintaining UI consistency across desktop operating systems using TypeScript to streamline operational workflows and provide a fluid user environment.

MyTaskOwl Web App

2024

Laravel | Angular | MySQL | AWS | Laravel Forge

Engineered and maintained a high-performance web-based productivity and staffing platform using Laravel and Angular to deliver an intuitive, responsive, and secure user experience. Scaled the backend database architecture with MySQL and deployed cloud infrastructure across AWS using Laravel Forge to ensure high availability, while optimizing client-side interactions and complex state management.
